## **DETAILED ACTION**

The declaration filed on 16 April 2007 under 37 CFR 1.131 is sufficient to overcome the Endo et al. and Yuen et al. references.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 2, 4, 7, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leung (United States Patent Publication No. 2003/0052115) in view of Nakagawa et al. (United States Patent Publication No. 2002/0189128).

Leung discloses a hair styling device that heats hair by conduction of heat from a heated surface (see para 0028) and includes a fan and a motor. The device further comprises a handle portion 100, a barrel portion 300 adjoining the handle portion, a heater 216 contained in the barrel portion, a flipper303 mechanically linked to a flipper actuator, air inlets in the housing, an air guide 119 for directing air into the barrel; ad outlet holes 307 formed in the barrel. Leung does not disclose the ion generator. Nakagawa et al. disclose a hair styling appliance having an ion generator system 62. The ion generator system comprises an anode pin and a cathode ring. The device further includes an indicator LED 9 for the ion generator. It would have been obvious to one skilled in the art to provide the curling iron of Leung with an ion generator system in view of Nakagawa et al. in order to treat the hair and make it smooth and silky.

Claims 1, 3-6 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cha (United States Patent Publication No. 2005/0056631) in view of Nakagawa et al.

Page 3

Cha discloses a flat straightener comprising a housing, heating plates 5, an ion generator comprising an array of electrodes, and an airflow system comprising an air guide, air inlets and air outlets 13. Cha does not disclose the motor and the fan. Nakagawa et al. disclose a hair styling appliance having an ion generator system 62 and a motor and fan. The ion generator system comprises an anode pin and a cathode ring. The device further includes an indicator LED 9 for the ion generator. It would have been obvious to one skilled in the art to provide the straightener of Cha with motor and fan in view of Nakagawa et al. in order to provide better flow of air and ions.

## Response to Arguments

Applicant's arguments with respect to claims 1-7, 9-13 have been considered but are moot in view of the new ground(s) of rejection.

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Todd E. Manahan whose telephone number is 571 272-4713. The examiner can normally be reached on Mon-Fri.

Art Unit: 3732

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Rodriguez can be reached on 571 272-4964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
